

# QUALITY, OCCUPATIONAL HEALTH, SAFETY AND ENVIRONMENTAL POLICY

Based on the continued improvement of its services, supported by a highly qualified work team, and together with its clients and stakeholders, Corporación Aeroportuaria del Este (Punta Cana Airport) is committed to create a culture through a Quality Management, Safety, Occupational Health and Environmental System, which involves the following:

## QUALITY

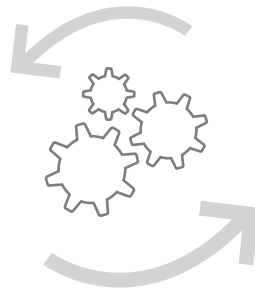

Landside and airside services marked by international-level quality, continuity, and suitability, which contribute to our clients' satisfaction and the company's economic growth.

## OCCUPATIONAL HEALTH AND SAFETY

A safe and learning-oriented work environment, in conditions that contribute to occupational safety and health that result in the well-being of people; with the commitment of all employees and their representatives to consultation and participation.

## ENVIRONMENTAL

Good environmental practices aimed at preventing pollution and ensuring the sustainable use of natural resources, management and reduction of greenhouse gas emissions, mitigation and adaptation to climate change, and protection of biodiversity and ecosystems.

We are well aware of the risks and dangers associated with the operations, safety, health of our staff members, and environmental impacts, and thus create, develop, and sponsor plans and programs to minimize or mitigate said risks and help us guarantee business continuity.

It is through this Management System policy that the Punta Cana Airport supports the strategic management of Grupo Puntacana, thus adjusting to the purpose and context of the organization, by complying with legal, client, and stakeholder requirements, as well as other.
